

Signs are coated with Viponds Graffiti Peel

Graffiti Peel is a water based coating that can be applied with a brush, pad applicator or spray.

The signs are graffitied

Over the graffitied area or over the total sign apply the self adhesive graffiti tape and squeegee on.
Score around the edge.

Peel away the tape with the coating and the graffiti is completely removed. Leaves the sign in perfect condition. Apply another coat of Viponds Graffiti Peel and it is protected again.
